

Personalised 3D holographic entertainment, now at your fingertips...

- Favourite artist's concert sold out?
- Want to see your favourite stars at a red carpet event, awards show or movie premiere?
- Struggling to browse your TV box / online service to find your favourite content even if in 2D?

With too few artists, limited seating, high prices and too many venues to fill, millions of fans globally are left wanting more. The world of live and digital entertainment is changing incredibly quickly. There is a huge demand for innovative live experiences as we change the ways we consume content.

Introducing Virtual Entertainment by Virtual Presence!

Our platform is a low cost, always ready, high volume solution. It gives fans easy access to their favourite artists in **life-like holographic 3D**.

The platform can be delivered in whatever way your audiences want. A life-size hologram in a concert venue and a touring holographic roadshow using mobile trucks are two popular options. Our team has already delivered projects with Mariah Carey appearing magically in multiple cities across Europe at the same time.

Another incredible example saw **three Janet Jacksons** perform on the same stage at once, a real treat for fans in New Orleans!

We now have **Virtual Mobile** and **Virtual Tablet** units, giving fans 3D experiences in their own home from under £5 per unit. All you need is a smartphone or tablet!

Whether live streaming, Pay Per Download or free of charge, brands and artist labels can now connect emotionally in 3D with their fans globally.

From personalised greetings and messages from virtual celebrities, to 3D invites or even a 3D Virtual Pokémon waking you up each morning, Virtual Mobile offers a brand new immersive way to consume digital content across the entertainment sector.
